

Salvati, Domenico

Forschungsgebiet / Research Topic

Management of IT Risk for Global Banks

Curriculum Vitae

Domenico Salvati graduated from the University of Zürich in 1998 in economy and computer science. He focused his studies on Information Security and won the Best Paper Award with his diploma thesis "Organisatorische Aspekte der Informationssicherheit" in Stuttgart in 1998. After his studies Domenico Salvati worked for Arthur Andersen where he mainly conducted IT reviews and risk assessments for the service manufacturing industry. In 1999 Domenico Salvati joined Migrosbank in the role of Chief Information Security Officer where he contributed in developing a smart card for e-banking and encrypted the banks network based on an outsourcing relationship with a service provider. In July 2001 Domenico Salvati joined Credit Suisse where he gained leading experience in the sector "Operational Information Security Services". Domenico Salvati focuses on project security, network security, and risk assessments of IT systems. At Credit Suisse Domenico Salvati set up an international network of security specialists called the Regional Information Security Officer Forum. In his spare time Domenico Salvati enjoys being with friends and playing Djembe (west african drum).
